SUMMARY

Motivated Computer Science undergraduate with knowledge of Java, Python, Front-End development, and basic Data Structures & Algorithms (DSA). Skilled in problem-solving, web application development, and building real-world projects using modern technologies. Quick learner with adaptability to new technologies, seeking an entry-level opportunity to apply technical skills and contribute effectively in a professional environment.

EDUCATION

Marri Laxman Reddy Institute of Technology and Management, Dundigal **2022 – 2026**
B.Tech in Computer Science and Engineering

CGPA: 7.20

SKILLS

Programming Languages	Python, Java
Web Development	HTML, CSS, Node.js
Databases	SQL, MongoDB
Developer Tools	Git, GitHub

WORK EXPERIENCE

Deep Learning Intern – Central Institute of Tool Design (CITD)

- Gained hands-on experience in deep learning concepts, neural networks, and AI model development through practical training.
- Worked on data preprocessing, model training, and performance evaluation using Python-based deep learning frameworks.

Google Android Developer Virtual Intern – EduSkills

- Learned Android application development fundamentals, UI design, and mobile application development concepts through virtual internship training.
- Developed knowledge of Android Studio, application lifecycle, and responsive mobile interface design principles.

PROJECTS

HireMate AI – AI Job Application Assistant

- Developed an AI-powered resume and job matching system using Python, FastAPI, React, and machine learning techniques to analyze resumes against job descriptions.
- Implemented resume PDF processing, skill extraction, job-skill matching, missing-skill identification, and personalized recommendations to improve job application relevance.
- Designed an ATS-focused resume analysis approach considering resume structure, formatting, skills, keywords, and job-description alignment to provide practical resume improvement suggestions.

AI-Based Medical Laboratory System

- Developed a full-stack AI-powered healthcare platform using React, Node.js, Express.js, MongoDB, and Python for disease prediction and laboratory management.
- Implemented machine learning models for multiple disease predictions with secure authentication, REST APIs, and role-based access control.
- Designed features including appointment booking, report management, and personalized health recommendations to improve user experience and healthcare accessibility.

CERTIFICATIONS

- Smart Coder Certification – Smart Interviews
- ServiceNow Certified System Administrator (CSA)
